HS/Taric codes

Global Logistics

CUSTOMS TARIFF NUMBERS

At least eight-digit HS (Harmonized System) code is used to uniquely identify traded commodities.

It tells the customs authorities which goods your shipment contains and which import duties and taxes are applicable upon import.

Don't know what HS codes you should enter?

For a complete overview of goods with respective HS codes see [here](#) (Commodity /nomenclature/ code).

TSP – Transitional Simplified Procedure.

TSP NUMBER

The TSP number simplifies the import customs procedure (reducing the amount of information that British consignees are required to provide in the import custom declaration).

It is applicable to most goods (except dangerous goods).

A British recipients and/or importers have to register to get a TSP number.

TSP number must be included in imported shipments documents accompanying.

For instructions how to register for TSP see [here](#).
